

ABOUT ME

"I am a Fullstack Developer with a deep passion for user-centered design and robust system engineering. My focus is on crafting end-to-end digital solutions—from responsive, visually engaging, and highly functional user interfaces (React, TypeScript) to resilient, high-concurrency backend architectures and IoT edge gateways (Golang, PostgreSQL, MQTT). Known for my adaptability, diligence, and continuous drive to refine both technical and collaborative skills, I thrive on taking on complex challenges in dynamic environments where I can deliver impactful, reliable products and contribute to collective engineering growth."

KHA TRAN

SOFTWARE ENGINEER

EDUCATION

BACHELOR OF COMPUTER SCIENCE

Open University

- Database.
- Network programming.
- Object-oriented programming.

CERTIFICATES

FRONT END PROGRAMMING

Certificate about Front end programming course at Ho Chi Minh City University of Science.

WORK EXPERIENCES

2016 - 2017

FRONT-END DEVELOPER - Sutrix Solutions

- Develop and maintain front-end functionality of websites with HTML, CSS and **Vanilla JavaScript** compatible with many browsers (cross-browser).

2017 - 2018

FRONT-END DEVELOPER - TMA Solutions

- Develop and maintain front-end functionality of websites.
- Develop websites with HTML, CSS, **Vanilla JavaScript**, **Angular** compatible with many browsers (cross-browser).

LANGUAGES

ENGLISH

- Read and write references.
- Listen, speak and take notes when through meetings, calling with customers on an average level.

STRENGTHS

Friendly and collaborative
Easily build good relationships with teammates and contribute to a positive working environment.

Fast adaptability
Quickly adjust to company culture, workflows, and new working styles.

Project responsiveness
Able to catch up with project demands rapidly, ensuring tasks are delivered on time.

Quick learner with new technologies
Adapt well to the company's tech stack and new tools, allowing smooth integration into ongoing and new projects.

2018 - 2022

FRONT-END DEVELOPER - NashTech VN

- Responsible for working on multiple projects at the same time, designing engaging websites, interacting daily with your graphic designers, back-end developers and marketing teams.
- Join discussions with customers to clarify what they want.
- Develop and maintain front-end functionality of websites.
- Create websites with good Accessibility support
- Proficient in using project support tools such as **Jira, Azure DevOps, Microsoft Teams**... and apply the Scrum process well in the project.
- Complete projects with many languages and frameworks such as: **Vanilla JavaScript**, **jQuery**, **ReactJs**, **Angular**, **Material UI**, **Tailwin CSS**, **Bootstrap**...
- Experience working with Back-end support tools: **Umbraco, Docker, Postgre SQL, Fliplet** (tool to support mobile app creation) ...

3/2023 - 10/2025

FRONT-END DEVELOPER - Freelance/Contract

- Worked as a freelance Front-end Developer with 6-month to 1-year contracts at Techcombank and 3 to 6-month contracts at Vertis Digital Singapore.
- Develop e-commerce website projects using **Angular, NgRx, RxJS** or the Shopify platform for individual customers.
- Implemented state management for cart, product filtering, and configured **Firebase** for authentication.
- Integrated **REST APIs**, payment gateways, shipping services.
- Deployed applications on **Linode servers, Vercel** and AWS with IP-based setup, domain configuration using **Nginx**, and **SSL certificate** installation.

04/2026 - Present

FULLSTACK DEVELOPER - Techera

I contributed to the architecture and development of an end-to-end *Theme Park Ticketing & IoT Access Control Platform**. Utilizing *Golang*, *PostgreSQL*, *Redis*, and *RabbitMQ*, I built resilient microservices capable of processing high-volume ticket transactions while enforcing strict ACID guarantees and anti-fraud protections. Additionally, I implemented an *Offline-First IoT edge gateway* using *MQTT* to ensure uninterrupted access control across physical turnstiles during network disruptions.

PROJECTS

AOSTE

Web for Restaurants and Food
- Domain: https://aoste.fr

My responsibilities :

- Build and maintain the website and front-end modules using **Vanilla JavaScript**, **jQuery**, and **Bootstrap 3**, ensuring responsive design and smooth user experience.
- Verify, troubleshoot, and fix bugs to ensure stable website performance.

SOCOTEC

- **Description**: A mobile application created based on the Fliplet engine
- **Domain**: **https://www.socotec.com/**

My responsibilities :

- Build and maintain the website and front-end modules using **Vanilla JavaScript**, **jQuery**, and **Bootstrap 4**, ensuring responsive design and smooth user experience.
- Collaborate with back-end teams using technologies such as **Umbraco CMS**, **Docker**, **PostgreSQL**, and **Fliplet** (for mobile app support).
- Implement UI updates, enhance component usability, and ensure seamless integration between the web platform and the **Fliplet-based** mobile application.

SHOPIFY E-COMMERCE PROJECT

- **Description**: Developed a customized Shopify e-commerce platform integrated with a **tailor-made Angular CMS** to streamline back-office operations and enhance SEO performance.

My responsibilities :

- **Shopify Development:** Customized storefront using Liquid, HTML, CSS, and JS; integrated third-party apps for payments and logistics.
- **Custom CMS (Angular):** Built a dedicated admin dashboard using **Angular & TypeScript** to manage metadata and sync real-time data via **Shopify Admin API**.
- **State Management:** Utilized **RxJS** for efficient data handling and integrated **RESTful APIs** for seamless backend communication.

OPEN UNIVERSITY UK

- **Description**: The homepage of the UK Open University, complete the interface and create pages of tools to support online learning.
- **Domain**: **https://www.open.edu/openlearn/**

My responsibilities :

- Build, maintain website and front-end modules using **Vanilla JavaScript, jQuery** and **Bootstraps.**
- Integrate front-end with back-end systems developed on **Drupal (PHP)** and later migrate and adapt functionalities to **Moodle (PHP)** to support the transition of the learning management platform.
- Contribute to UI/UX implementation for projects such as The UK Open University's homepage and internal learning tools, ensuring intuitive navigation and consistent design.
- Ensure **Accessibility (A11y)** compliance, creating inclusive user experiences that meet international accessibility standards (WCAG).

NASTECH VN LANDING PAGE

- **Domain**: **https://www.nashtechglobal.com** and **https://virtualvietnam.nashtechglobal.com**

My responsibilities :

- Developed and maintained scalable front-end modules using **ReactJS** and **Tailwind CSS**, following best practices.
- Collaborated cross-functionally with Back-end, Product Owner, and Marketing teams to deliver features and optimize technical SEO.
- Improved stability and performance through debugging, refactoring, and continuous optimization.
- Developed an interactive 3D/360° web experience using **JavaScript** and **Three.js** for NashTech's Virtual Vietnam.

ONE SOLUTION (ONESS)

Developed a web-based platform supporting FMCG business operations for Tân Hiệp Phát.

My responsibilities :

- Developed dynamic, high-performance web interfaces using **Angular (v14+)** and **.NET Blazor/Razor Pages**.
- Built reusable UI components and managed complex application states using **RxJS** and **Angular Services**.
- Integrated frontend views with **.NET backend APIs** to ensure real-time data synchronization for FMCG workflows.

TECHCOMBANK WEBSITE

- **Description**: Page introducing TECHCOMBANK banking information.
- **Domain**: **https://techcombank.com/**

My responsibilities :

- Maintain web author content management system (CMS) Adobe experience manager (**AEM**).
- Customize and develop modular components within Adobe Experience Manager (**AEM**) using **Vanilla JavaScript**, enabling drag-and-drop page building and reusable front-end modules for dynamic content creation.
- Authoring and publishing digital assets, content, and documents in a centralized asset management system.
- Maintain authoring structure, content fragments, SEO, accessibility and authoring requirements for all tasks executed.

TICKET SALES WEBSITE AND LANDING PAGE

Developed ticket sales website and park introduction pages for **Marina Bay Sands** in Singapore.

My responsibilities :

- Built and optimized e-commerce platforms using **ReactJS, Next.js, Redux**.
- Developed Progressive Web Apps (**PWA**) with **React Native** Web for both web and mobile.
- Implemented state management for cart, product filtering, and authentication.
- Integrated **REST APIs**, payment gateways.
- Applied SSR/SSG for SEO and high performance.
- Configured **Firebase** for authentication, hosting, and cloud services.
- Ensured responsive design, cross-browser compatibility, and performance optimization.

THEME PARK MANAGEMENT & IOT ACCESS CONTROL ECOSYSTEM

A distributed enterprise ticketing and access control platform designed for high-concurrency theme parks and entertainment attractions. The ecosystem integrates a central management backend, an edge IoT gateway for on-premise hardware control (turnstiles/scanners), and two modern web portals (Operations Admin and B2B/OTA Partner Portal).

My responsibilities :

- **Theme Park Management & IoT Ticketing Ecosystem***(Golang, PostgreSQL, Redis, RabbitMQ, MQTT, React, TypeScript, Docker)*
- Architected and implemented high-throughput backend services and IoT edge gateways in ***Golang (Gin, SQLC)***, processing concurrent ticket orders and real-time physical access control.
- I built resilient microservices capable of processing high-volume ticket transactions while enforcing strict ACID guarantees and anti-fraud protections.
- Designed an ***Offline-First IoT edge gateway*** synchronization mechanism via ****MQTT**** and edge caching, guaranteeing 100% gate operation uptime during central server network interruptions.
- Implemented distributed locking via ***Redis*** and row-level database transactions (`SELECT FOR UPDATE`) to prevent double-spending and inventory overselling during flash sales.
- Built public-facing ***OpenAPI/REST*** integration endpoints for major OTA channels (Klook, Traveloka...) and developed operational portals using ***React, TypeScript, and Ant Design***.
